

Scenario: Chris' responses

You are a very busy person always on the go and with no time to make meals to eat healthy and right. You need some way to be able to eat, order and find food quickly.

Task 1: Type your current location and allow the app to find near locations for you to be able to eat from.

Task 2: Browse through the choices provided. These locations should be the ones nearest to you. Pick the one that sounds most appealing and closest to you.

Task 3: use the in app GPS to take you to this restaurant from you location and enjoy.

Notes:

What changes would you make to the APP: (3 things)

- Allow to filter the list to certain types of restaurants
- Allow for biking or walking options when providing directions
- Allow to create a carpool like option that then lists chosen restaurants by nearest to furthest

What would you keep the same: (3 things)

- The icon
- The simple ui
- The format
